

BUSINESS PROPOSAL · EDITABLE TEMPLATE

[ENGAGEMENT OR INITIATIVE TITLE]

[One concise line describing the intended outcome]

Prepared for: **[Client or organisation]**

Document details	Ownership
Date [Date]	Proposal owner [Owner name]
Version 2.0	Prepared by INTAG Digital Solutions

DOCUMENT STATUS Logo 02 “Connected Frame” is approved. All other identity, scope, investment, and timeline decisions remain under review and approval.

Replace every bracketed field before sharing the final version.

Executive summary

This section explains why the work matters, the intended outcome, and what requires approval before delivery begins.

Context

[Summarise what is happening now, who it affects, and why it needs attention at this time.]

Challenge and intended outcome

[Frame the challenge in business terms, then define the intended outcome without turning it into a promise or guaranteed result.]

Evidence status

Classification	What to enter
Confirmed fact	[Documented fact or approved decision that can be used as a basis for action]
Reported information	[Information shared by a stakeholder and not independently verified]
Hypothesis to test	[Interpretation or direction that requires testing or validation]

Proposed success criteria

- [Measurable indicator] — Baseline: [value]; proposed target: [value]; measurement method: [method].
- [Quality or experience indicator] — Proposed acceptance threshold: [threshold]; measurement owner: [owner].

APPROVAL NOTE Targets and indicators remain proposed until baseline data, the measurement method, and the accountable owner are approved.

Decision required

[State the decision needed from the client now, why it is needed, and the authorised approver.]

Open questions

- [Question affecting scope] – Owner: [name] – Response due: [date].
- [Question affecting measurement or approval] – Owner: [name] – Response due: [date].

Scope and approach

Convert the objective into defined deliverables, acceptance evidence, and clear ownership. Keep only approved workstreams in the final version.

Workstream	Proposed deliverable	Acceptance evidence	Status
Strategy & Business Advisory	[Defined strategy deliverable]	[Approval record or decision document]	Under review
Brand & Media	[Defined brand asset or content output]	[Review criteria and asset list]	Under review
Technology & Digital Products	[Defined digital solution or product]	[Documented test, demonstration, or handover]	Under review
Marketing & Growth	[Defined experiment or campaign]	[Measured result or documented learning]	Under review

Delivery approach

1. Discovery and definition: Review the context, available evidence, and constraints, then confirm the question to be resolved.
2. Design and testing: Develop a reviewable direction and test it within agreed boundaries.
3. Validation and refinement: Assess the evidence, review feedback, and revise the underlying assumptions.
4. Handover and approval: Document the outputs, decisions, ownership, and next step.

Scope boundaries

- Only work explicitly stated in the approved version of this proposal is included in scope.
- External licences, media spend, hosting, maintenance, and integrations remain to be defined unless explicitly included.
- Any material change to scope, duration, or investment requires a documented change decision before implementation.

Dependencies and inputs

- From the client: [Required data, assets, access, or feedback].
- From INTAG: [Delivery owner, review criteria, and handover requirements].
- From a third party: [Licence, approval, or external service, if applicable].

Timeline and responsibilities

Timing begins once the inputs and approvals for each stage are complete. Indicative durations are not final commitments before scope approval.

Stage	Indicative duration	Primary output	Owner
Discovery and definition	[Number of days or weeks]	Validated brief and initial scope	[Owner name]
Design and testing	[Number of days or weeks]	Reviewable and testable draft	[Owner name]
Validation and refinement	[Number of days or weeks]	Measurement findings and agreed refinements	[Owner name]
Handover and approval	[Number of days or weeks]	Handover package and decision log	[Owner name]

INTAG responsibilities

- Manage the agreed work, make assumptions and constraints explicit, and keep decisions traceable.
- Present outputs for review against the agreed scope and record anything requiring approval or third-party input.

Client responsibilities

- Provide the required inputs, access, assets, and feedback at the agreed times.
- Name the authorised decision-makers and approve scope, outputs, and changes in writing.

SCHEDULE RULE If an approval or essential input is delayed, duration, dependencies, and commercial impact must be reviewed before a new date is confirmed.

Review gates

Gate	Decision required	Approver
After discovery	Confirm the objective, scope, and measurement approach	[Name]

Gate	Decision required	Approver
After the first draft	Approve the refinement direction or request a defined change	[Name]
Before handover	Approve the outputs, ownership, and next step	[Name]

Investment and approval

Use this section to record the basis of estimate, not to enter a final price before commercial and technical review is complete.

Item	Basis of estimate	Proposed amount	Status
Professional fees	[Scope, effort, and duration]	[Amount to be confirmed after review]	Under review
External services or licences	[Supplier and expected use]	[Separate estimate]	Under review
Production or media spend	[Plan and scale of delivery]	[Separate estimate]	Under review
Taxes and expenses	[Subject to the agreement and applicable rules]	[To be defined in the final agreement]	Under review

Commercial terms requiring approval

- Proposal validity: [Proposed period following approval].
- Payment schedule: [To be defined by the commercial owner and approved in writing].
- Change and cancellation terms: [To be reviewed and documented in the final agreement].

COMMITMENT BOUNDARY This proposal does not guarantee sales, growth, accuracy, delivery dates, or operational readiness. Scope, investment, and timeline become binding only after authorised owners approve them in a final document.

Approval

Client approval	INTAG approval
